HCC CODER WORKBENCH

Optimizing Coding Accuracy through AI-powered Efficiency

The world of hierarchical condition category (HCC) risk adjustment coding for Medicare Advantage plans (MAOs) is constantly evolving. In this turbulent world, one operational component stands out as a main challenge: **manual coding.**

How We Solve Coding Challenges

- **Inaccurate coding** – driven by subjectivity and human fatigue.

- **Delayed risk adjustment and premium setting** – due to the time-intensive nature of manual coding and chart review.

- **Missed early interventions** – as manual coding may not provide timely insights into emerging health trends and risk factors.

- **Scaling difficulties -** as the reliance on manual coding makes achieving scalability difficult.

- **Compliance maintenance** – is a significant challenge due to HCC coding errors.

HCC CODER WORKBENCH

THE KEY TO UNLOCKING IMPROVED OUTCOMES AND FINANCIAL PERFORMANCE

Streamline risk adjustment coding with Invent Health's HCC Coder Workbench, an innovative SaaS platform powered by artificial intelligence (AI). This solution uses natural language processing (NLP), delivering precise coding recommendations. Built for adaptability, Coder Workbench enables plans to customize workflows that seamlessly integrate with existing internal and external systems through robust APIs.

HCC CODER WORKBENCH – KEY CAPABILITIES

Enhanced Accuracy: Via pre-trained NLP models and continuous learning algorithms.

Increased Efficiency: By automating tasks such chart review and code assignment. Coding backlogs are reduced, boosting productivity.

Customizable Workflows: For specific coding needs and provider preferences. Integrates directly with EHRs via APIs.

Auditable & Transparent: Clear audit trails for documentation and regulatory compliance.

SELECT METRICS AND KPIS

Accuracy: Eliminate the headaches of manual coding and improve HCC coding accuracy to 80 %+ with NLP from day one. Achieve 97 %+ when combined with Invent Health's coding services.

Productivity Gains: Reduce chart review timeframe and coding backlog for an improvement of 5x – 8x in coding productivity.

Net New Conditions: Recognize a 20% - 25% uplift in uncovering previously undocumented conditions

Invent Health is a trusted partner to health plans across all managed care lines of business. Our innovative solutions and unwavering commitment to client success enable managed care plans to solve pervasive risk adjustment, coding and care gap closure challenges.

Let's talk! Contact us to schedule your demo and discover how Invent Health can improve coding accuracy, member outcomes, and plan financial performance today.

INVENT HEALTH

RISK ADJUSTMENT, DRIVEN BY AI AND NLP
