HEALTH

RISK ADJUSTMENT, DRIVEN BY AI AND NLP

# INVENT HEALTH MODULAR ANALYTICS PLATFORM

Your engine for end-to-end risk performance improvement

As managed care members churn across programs, for example shifting from Medicaid to an ACA Marketplace plan, member data gets lost in the shuffle.

Now, regulatory audits have become more stressful, in-home assessment (IHA) and Annual Wellness Visit (AWV) participation and results suffer, revenue integrity lags, and member intervention opportunities are missed. The impact on all types of managed care health plans, providers, and members can be profound.

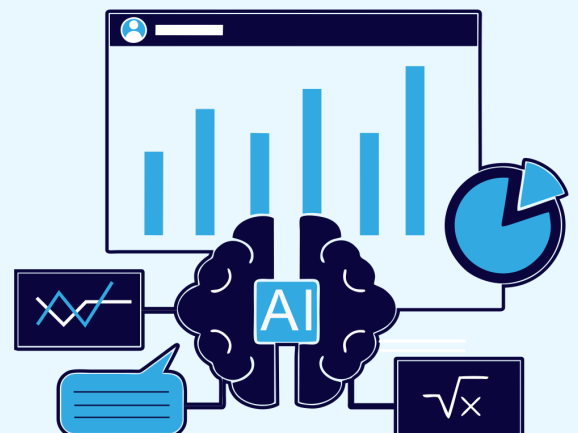

Invent Health bridges these gaps and delivers demonstrable results to all managed care stakeholders with our **Modular Analytics Platform (MAP)**.

## MAP ensures:

- Disparate coding, claims and care data are integrated into a single source of truth.
- Complete support for retrospective, concurrent and prospective suspecting strategies through **AI/ML-powered suspecting and analytics**.
- Proactive quality and care coordination.

## Challenges We Solve

- **Fragmented risk and member data.**
- **Inaccurate risk score and revenue forecasting.**
- **Disparate utilization and quality metrics.**
- **Inefficient chart review and AWV tracking.**
- **Incomplete provider group and member stratification.**

# INVENT HEALTH

## MODULAR ANALYTICS PLATFORM

Your engine for end-to-end risk performance improvement

KEY CAPABILITIES	SUPPORTING FEATURES
Improve care coordination for high-risk chronic conditions	<b>ROI Tracking &amp; Executive Visibility</b> <ul style="list-style-type: none"><li>Unified dashboards for risk &amp; quality</li><li>Drill-down to provider, cohort, and condition level</li><li>Continuous ROI attribution across vendors &amp; campaigns</li><li>Provider stratification &amp; prioritization, hybrid outreach (virtual chart retrieval, telehealth AWWs), aligned incentives</li></ul>
Enhance risk score and revenue forecasting accuracy and revenue integrity	<b>HCC-First, Model-Aware Risk Analytics</b> <ul style="list-style-type: none"><li>V28-ready suspecting with ICD drilldowns &amp; recapture tracking</li><li>RADV audit defense with claim-level traceability</li><li>Forecast RAF impact by provider, geography, and condition</li></ul>
Accelerate IHA and AWW participation and reporting	<b>In-Home &amp; Virtual Assessment Integration</b> <ul style="list-style-type: none"><li>Seamless handoffs for primary care physician (PCP) follow-up</li><li>Member prioritization by show-rate &amp; HCC yield</li><li>Lightweight coder-assist tools for faster documentation</li><li>Multi-channel outreach. Pre-fill suspected conditions into AWW/ HRA templates, coder-assist tools</li></ul>
Deliver comprehensive prospective, concurrent and retrospective risk adjustment suspecting	<b>AWV &amp; Preventive Visit Orchestration</b> <ul style="list-style-type: none"><li>Eligibility intelligence by IPA/PCP.</li><li>OCR + NLP ingestion of AWW forms for CMS-compliant coding.</li><li>Real-time AWW dashboards with “next best action” guidance.</li></ul>
Improve cross-LoB member health tracking	<b>Cross-LoB analytics to recapture missed RAF, track member transitions across Medi-Cal, ACA, DSNP</b> <ul style="list-style-type: none"><li>SDoH-aware, multilingual outreach</li><li>Convert HRA/ECM touchpoints into auditable risk documentation</li></ul>
